

Argus photo ... 1/300 ... F:3.5
... Plus X film

For Good Pictures ... use Argoflex

It's easy to make good pictures with Argoflex because you see the final picture before it is taken ... its focusing ground glass assures you of clear, sharp negatives ... its F:4.5 anastigmat lens is color-corrected for superb COLOR or black and white pictures ... its precise shutter has the useful speeds 1/10 to 1/200 ... just the right combination for top-notch performance.

Ask your dealer to show you Argoflex.
